EXERCISE BIKE OWNER'S MANUAL

IMPORTANT PRECAUTIONS

SAVE THESE INSTRUCTIONS

Read all instructions before using this bike. When using an electrical product, basic precautions should always be followed, including the following: Read all instructions before using this bike. It is the responsibility of the owner to ensure that all users of this bike are adequately informed of all warnings and precautions.

WARNING

To reduce the risk of burns, fire, electrical shock or injury to persons:

- If you experience chest pains, nausea, dizziness, or shortness of breath, stop exercising immediately and consult your physician before continuing.
- Maintain a comfortable pace. Do not sprint above 80 rpms on this machine.
- To maintain balance, it is recommended to keep a grip on the handlebars while exercising, mounting or dismounting the machine.
- Do not wear clothes that might catch on any part of the bike.
- Do not turn pedal arms by hand.
- Make sure handlebars are secure before each use.
- Do not insert or drop any object into any opening.
- Unplug bike before moving or cleaning it. To clean, wipe surfaces down with soap and slightly damp cloth only; never use solvents. (See MAINTENANCE)
- This bike should not be used by persons weighing more than 136kg Failure to comply will void the warranty.
- The exerciser complies with the EN957-1/-5 standard, class of exerciser:HA; braking system is adjustable.
- This bike is intended for in-home use only. Do not use this bike in any commercial, rental, school or institutional setting. Failure to comply will void the warranty.
- Do not use bike in garages, porches, pool rooms, bathrooms, car ports or outdoors. Failure to comply this may void the warranty.
- Use the bike only as described in this manual.

At NO time should pets or children under the age of 12 be closer to the bike than 10 feet.
At NO time should children under the age of 12 use the bike.
Children over the age of 12 should not use the bike without adult supervision.

It is essential that your bike is used only indoors, in a climate controlled room. If your bike has been exposed to colder temperatures or high moisture climates, it is strongly recommended that the bike is warmed up to room before first time use. Failure to do so may cause premature electronic failure.

BEFORE YOU BEGIN

CONGRATULATIONS! on choosing your bike. You've taken an important step in developing and sustaining an exercise program! Your bike is a tremendously effective tool for achieving your personal fitness goals. Regular use of your bike can improve the quality of your life in so many ways.

HERE ARE JUST A FEW OF THE HEALTH BENEFITS OF EXERCISE:

- Weight Loss
- A Healthier Heart
- Improved Muscle Tone
- Increased Daily Energy Levels

The key to reaping these benefits is to develop an exercise habit. Your new bike will help you eliminate obstacles that prevent you from exercising. Inclement weather and darkness won't interfere with your workout when you use your bike in the comfort of your home. This guide provides you with basic information for using and enjoying your new machine.

LOCATION OF THE BIKE

Place the bike on a level and stable surface. There should be 6 feet of clearance behind the bike, 3 feet on each side and one foot in front for the power cord (See diagram to the right). Do not place the bike in any area that will block any vent or air openings. The bike should not be located in a garage, covered patio, near water or outdoors.

ASSEMBLY

WARNING

There are several areas during the assembly process that special attention must be paid. It is very important to follow the assembly instructions correctly and to make sure all parts are firmly tightened. If the assembly instructions are not followed correctly, the fitness bike could have frame parts that are not tightened and will seem loose and may cause irritating noises. To prevent damage to the fitness bike, the assembly instructions must be reviewed and corrective actions should be taken.

Before proceeding, find your bike's serial number located on the front stabilizer tube and enter it in the space provided below. Also locate the model name which is next to the serial number.

ENTER YOUR SERIAL NUMBER AND MODEL NAME IN THE BOXES BELOW:

SERIAL NUMBER:

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

MODEL NAME: **HORIZON**

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

- ☐ 1 Power Cord
- ☐ 1 Hardware Kit

PRE ASSEMBLY

UNPACKING

Unpack the product where you will be using it. Place the carton on a level flat surface. It is recommended that you place a protective covering on your floor. Never open box when it is on its side.

NOTE: During each assembly step, ensure that ALL nuts and bolts are in place and partially threaded in before completely tightening any ONE bolt.

NOTE: A light application of grease may aid in the installation of hardware. Any grease, such as lithium bike grease is recommended.

NEED HELP?

If you have questions or if there are any missing parts, contact your local dealer.

PAROS PRO

ASSEMBLY STEP 1

PAROS
PAROS PRO

NOTE: There is no hardware for this step.

- A Attach the **REAR STABILIZER TUBE** to **MAIN FRAME** using 2 **PRE-INSTALLED BOLTS**.
- B Attach the **FRONT STABILIZER TUBE** to **MAIN FRAME** using 2 **PRE-INSTALLED BOLTS**.

ASSEMBLY STEP 2

HARDWARE PARTS:

 **BOLT (68)**
M8 x 15
Qty: 6

 **SPRING WASHER (67)**
Ø8
Qty: 6

 **ARC WASHER (69)**
Ø8 x Ø19 x 1.5T
Qty: 2

 **FLAT WASHER (66)**
Ø8 x Ø19 x 1.5T
Qty: 4

- A Slide **CONSOLE MAST GROMMET** from bottom up the **CONSOLE MAST**.
- B Attach **CONSOLE CABLES** and tuck cables into **MAIN FRAME** carefully.
- C Slide **CONSOLE MAST** into **MAIN FRAME** using 4 **BOLTS (68)**, 4 **SPRING WASHERS (67)**, 4 **FLAT WASHERS (66)** from both sides and 2 **BOLTS (68)**, 2 **SPRING WASHERS (67)**, 2 **ARC WASHERS (69)** from front side.
- D Slide **CONSOLE MAST GROMMET** down over **MAIN FRAME**.

NOTE: Be careful not to pinch any wires while attaching the console mast.

PAROS
PAROS PRO

ASSEMBLY STEP 3

PAROS
PAROS PRO

NOTE: There is no hardware for this step.

- A Attach **SEAT** to **SEAT POST**.
- B Pull the **SEAT HEIGHT ADJUSTMENT KNOB** outward while sliding the **SEAT POST** into **MAIN FRAME**.

ASSEMBLY STEP 4

NOTE: There is no hardware for this step.

- A Attach the **RIGHT PEDAL** to the **RIGHT CRANK ARM**, tightening it **CLOCKWISE** with the provided flat wrench.
- B Attach the **LEFT PEDAL** to the **LEFT CRANK ARM**, tightening it **COUNTER-CLOCKWISE** with the provided flat wrench.

BIKE OPERATION

ADJUSTING THE SEAT

To adjust the seat by rotating the knob and loosen the screw. Pull out the knob and adjust the seat to a comfortable pedaling position (one that keeps a slight bend in your knee while your legs are in the extended position). Lock the screw by rotating knob clockwise until it tightens.

NOTE: It is recommended that you do not sit on the seat while adjusting its position.

ADJUSTING THE HANDLEBAR

To adjust the handlebar by rotating the knob and loosen the screw. Then, pull out the knob and adjust the handlebar to a position you prefer. Lock the screw by rotating knob clockwise until it tightens.

WARNING

Do not operate the bike if the adaptor is damaged. If the bike appears to not be working properly, do not use the bike.

WARNING

Our bikes are well built and heavy! Use care and additional help if necessary when moving.

PAROS PRO

PAROS & PAROS PRO CONSOLE OPERATION

A) UP/DOWN KEY

- 1) Press to increase and decrease the value.
- 2) Press to scroll and browse items which you can select.
- 3) Press to increase and decrease the resistance.

B) MODE KEY

- 1) Changing display and confirm data setting .
- 2) After Body Fat testing press Mode key to change display.

C) START/STOP KEY

To start and pause a workout.

D) RECOVERY KEY

If heart rate data is available, you can press Recovery key to start the Recovery function.(Refer to Recovery operation on page 19 for more information)

E) RESET KEY

When data setting, press Reset key to default value.

Hold the Reset key for 3 seconds to reset the system at anytime during workout.

F) BODY FAT

For evaluating body fat and BMI index. (Refer to page 19 for more operation information)

SETUP YOUR PERSONAL DATA

This console is able to store your personal data which includes name, gender, age and weight. This allows you to start your workout more quickly. To set up your data, please follow the procedure as below,

- 1) Select user from 1 to 4
- 2) Select your gender
- 3) Select your age
- 4) Select your weight
- 5) The console is able to store up to 4 users' data and you may modify your setting before your daily workouts.

START YOUR WORKOUT

- 1) Make sure the power is on.
- 2) Press Mode key to enter main menu after finish user setting.
- 3) Press Up/Down key to select workout in main menu, then press mode key to confirm.
- 4) To choose preset programs please select program and press mode key.
- 5) After workout selection, press Up/Down key to set the workout time.
- 6) Press Start key to start the workout.

QUICK START

- 1) Make sure the power is on.
- 2) Simply press the "START" key and begin exercising.

MANUAL

Select manual at main menu and press start before workout selection.

HRC

- 1) finish personal data setting and enter main menu.
- 2) select HRC program at main menu and press mode key to enter setting.
- 3) select among 55%, 75% and 90% target or choose H.R.C. Target to set your desired number between 30 to 230.

USER PROGRAM

- 1) select User program at main menu and use up/down and mode key to set your own workout.
- 2) press mode key for 3 seconds for confirming setting

WORKOUT RECOVERY

After exercising for a period of time (more than 30 seconds), Press RECOVERY key, hold onto the handgrips to conduct a workout recovery test.

TIME will count down from 00:60 to 00:00 and then show your heart rate recovery status from F1,F2....to F6.

(F1-F6 stands for your Fitness quotient, with F1 being the best result)

User may keep exercising to improve the heart rate recovery status. (Press the RECOVERY button again to return the main display)

BODY FAT MEASUREMENT

- 1) Select User from U1 - U4 & workout then press START key.

- 2) After the selected workout is finished or stopped, press BODY FAT button to enter.

- 3) Holding both pulse grips for 8-10 seconds then test results (percentage and BMI rate) will be displayed on LCD for 30 seconds.

B.M.I. (Body mass index) integrated

B.M.I	LOW	LOW/MED	MEDIUM	MED/HIGH
RANGE	<20	20-24	24.1-26.5	>26.5

BODY FAT:

FAT%	(-) LOW	(+) LOW/MED	▲ MEDIUM	◆ MED/HIGH
MALE	<13%	13%-25.9%	26%-30%	>30%
FEMALE	<23%	23%-35.9%	36%-40%	>40%

WATTS CONTROL (PAROS PRO ONLY)

- 1) Finish user setting and enter workout selection.
- 2) Select Watts control program at main menu and press mode key.
- 3) Set target watt value by using up/down key.
- 4) Press start after finish setting.

ENERGY SAVER

To minimize energy consumption, your machine will enter energy saver mode automatically when not in use for 4 minutes and could be quickly activated again with a touch of a button.

CALENDAR AND TIME

While powering on, this console will allow you to set the CALENDAR and TIME by using UP & DOWN keys and MODE key to confirm.

PAROS
PAROS PRO

PAROS & PAROS PRO PRESET PROGRAM PROFILES

PAROS PRO

- **P1:** Promotes weight loss by raising and lowering the resistance level, while keeping you in your fat burning zone.

- **P2:** Improves your strength, speed, and endurance by raising and lowering the resistance levels throughout your workout to involve both your heart and muscles.

- **P3:** Challenges with various combinations of hills and valleys (resistance) to burn more fat when exercising.

- **P4:** Improves performance and stamina by raising the resistance level to high peaks to simulate the most difficult outdoor terrains.

- **P5:** Complete exercise program to help you enhance body performance.

- **P6:** Increasing resistance for advanced users to tone your muscles, and challenges yourself.

PRESET PROGRAM PROFILES (PAROS PRO ONLY)

- **P7:** Recover your heart and muscles after intensive workout.

- **P8:** Simulates plateau hiking by increasing and decreasing the resistance gradually.

- **P9:** Gradually increasing resistance with hills and valleys allows user to reach their daily target.

- **P10:** Improves performance and stamina by raising the resistance level to high peaks to simulate the hill environment.

- **P11:** Improve heart and lung capacity by simulates daily jogging.

- **P12:** Improves your strength, speed and endurance by automatically changing the resistance levels through-out your workout.

MONITORING YOUR HEART RATE

PAROS
PAROS PRO

FEEDBACK

Your Horizon Fitness bike offers two heart rate feedback options. You may choose to use the heart rate handlebars, or the chest transmitter (sold separately) for a hands free workout.

HEART RATE HANDLEBAR

Place the palm of your hands directly on the heart rate handlebars. Both hands must grip the bars for your heart rate to register. When gripping the handlebars, do not grip tightly. Holding the grips tightly may elevate your blood pressure. Try to maintain moderate pressure while holding onto the heart rate handlebars. It is recommended that you hold the handlebars only long enough to see your heart rate readout on the console. You may experience an erratic readout if consistently holding the handlebars.

TELEMETRIC CHEST TRANSMITTER (SOLD SEPARATELY)

Prior to wearing the chest transmitter (sold separately) on your chest, moisten the two rubber electrodes with water. Center the chest strap just below the breast or pectoral muscles, directly over your sternum, with the Horizon Fitness logo facing out. NOTE: The chest strap must be tight and properly placed to receive an accurate and consistent readout. If the chest strap is too loose, or positioned improperly, you may receive an erratic or inconsistent heart rate readout.

WARNING!

The heart rate reading is intended only as an exercise aid and not for medical purpose. Your heart rate monitoring systems may be inaccurate. Various factors may affect the accuracy of your heart rate reading. Over exercise may result in serious injury or death. If you feel faint stop exercise immediately.

CONDITIONING GUIDELINES

ALWAYS CONSULT YOUR PHYSICIAN BEFORE BEGINNING AN EXERCISE PROGRAM.

HOW OFTEN? (FREQUENCY OF WORKOUTS)

The American Heart Association recommends that you exercise at least 3 to 4 days per week to maintain cardiovascular fitness. If you have other goals such as weight or fat loss, you will achieve your goal faster with more frequent exercise. Whether it's 3 days or 6 days, remember that your ultimate goal should be to make exercise a lifetime habit. Many people are successful staying with a fitness program if they set aside a specific time of day to exercise. It doesn't matter whether it's in the morning before breakfast, during lunch hour or while watching the evening news. What's more important is that it's a time that allows you to keep a schedule, and a time when you won't be interrupted. To be successful with your fitness program, you have to make it a priority in your life. So decide on a time, pull out your day planner and pencil in your exercise times for the next month!

HOW LONG? (DURATION OF WORKOUTS)

For aerobic exercise benefits, it's recommended that you exercise from between 24 and 60 minutes per session. But start slowly and gradually increase your exercise times. If you've been sedentary during the past year, it may be a good idea to keep your exercise times to as little as five minutes initially. Your body will need time to adjust to the new activity. If your goal is weight loss, a longer exercise session at lower intensities has been found to be most effective. A workout time of 48 minutes or more is recommended for best weight loss results.

HOW HARD? (INTENSITY OF WORKOUTS)

How hard you workout is also determined by your goals. If you use your machine to prepare for a 5K workout, you will probably work out at a higher intensity than if your goal is general fitness. Regardless of your long term goals, always begin an exercise program at low intensity. Aerobic exercise does not have to be painful to be beneficial!

MAINTENANCE

WHAT KIND OF ROUTINE MAINTENANCE IS REQUIRED?

We use sealed bearings throughout our bikes so lubrication is not needed. The most important maintenance step is to simply wipe your perspiration off the trainer after each use.

HOW DO I CLEAN MY BIKE?

Clean with soap and water cleaners only. Never use solvents on plastic parts.

Cleanliness of your bike and its operating environment will keep maintenance problems and service calls to a minimum. For this reason, Horizon Fitness recommends that the following preventive maintenance schedule be followed.

AFTER EACH USE (DAILY)

Turn off the bike by unplugging the power cord from the wall outlet

- Wipe down the bike with a damp cloth. Never use solvents, as they can cause damage to the bike.
- Inspect the power cord. If the power cord is damaged, contact Horizon Fitness.
- Make sure the power cord is not underneath the bike or in any other area where it can become pinched or cut.

NOTE:

The safety level of the equipment can be maintained only if it is examined regularly for damage and wear, e.g. connection parts. If any deterioration is observed, immediately replace all faulty parts and do not use until it is repaired.

WARNING

To remove power from the bike, the power cord must be disconnected from the wall outlet.

WEEKLY

Clean underneath the bike, following these steps:

- Turn off the bike.
- Move the bike to a remote location.
- Wipe or vacuum any dust particles or other objects that may have accumulated underneath the bike.
- Return the bike to its previous position.

EVERY MONTH

- Inspect all assembly bolts and pedals on the machine for proper tightness.
